Introduction

Golden Gate National Recreation Area

Park Description

Golden Gate National Recreation Area was established as a unit of the National Park Service by an Act of Congress on October 27, 1972. Golden Gate National Recreation Area encompasses a broad range of territories totaling some 80,000 acres in and around the Bay Area of San Francisco, California, as well as Muir Woods National Monument (established January 9, 1908) and Fort Point National Historic Site (established October 16, 1970). The park contains a great diversity of cultural and natural resources. The park's museum collections include archeological materials, museum objects, and archives dating from pre-contact to the present. These cultural resources are preserved and maintained for the public by the Division of Cultural Resources and Museum Management, which includes the Park Archives and Records Center (PARC).

Golden Gate National Recreation Area has been collecting museum and archival collections since its earliest days as a national park. It holds almost five million three-dimensional and documentary artifacts. These are used by park staff, park associates and the public to manage, interpret and understand the various themes and resources of the park.

Park Archives and Records Center

Historical Note

Archival collections acquired since the earliest days of Golden Gate National Recreation Area document the history and activity of the various sites and groups related to areas of the park, as outlined in the park's Scope of Collection Statement (1997). These include the United States Army (Bear Flag Revolt, Civil War, Spanish-American War, Mexican War, World War I, Army Air Service, Coast Artillery, Army medical facilities and issues, World War II, Army support during natural disasters, Viet Nam War, and Operation Desert Storm); Alcatraz (Army fortress, Army Disciplinary Barracks, and U.S. Penitentiary); the natural resources conservation movement resulting in the establishment of Muir Woods National Monument; agriculture in the Marin Headlands; Point Reyes Peninsula and Bolinas Lagoon areas; U.S. Lifesaving/Coast Guard Services; San Francisco maritime history (most of this material was transferred to the San Francisco Maritime National Historical Park at the time of its separation from Golden Gate NRA in 1988); San Francisco Earthquake and Fire of 1906; Panama Pacific International Exposition of 1915; and preservation of open space in the Bay Area. Also included in the PARC are many of the administrative records of the early park years. These document the development and expansion of Golden Gate National Recreation Area, planning, public involvement, and public programs and events in the park throughout its history.

The Park Archives and Records Center is located in an historic brick building, formerly a cavalry stable, on the Presidio of San Francisco. It was established in 1994 to receive approximately 4,000 cubic feet of transferred Army records and 300 cubic feet of archives and special collections from the Presidio Army Museum, following the official closure of the Presidio as an

active Army post. It also houses all documentary (two-dimensional) materials pertaining to themes of the park as outlined in the Scope of Collection Statement (1997). The collections of the Park Archives and Records Center continue to grow annually, through the donation of materials by private individuals, transfer of inactive park records, and acquisition of valuable information and image collections relating to the scope of collections for the park. The Center contains facility records transferred from the United States Army pertaining to the Presidio of San Francisco, Forts Funston, Miley, Mason, Scott, Baker, Barry and Cronkhite, as well as other coast defense sites within the Bay Area, plus facility records created by the National Park Service for various park areas. Each year, additional material held by the Park Archives becomes available for research through various projects to arrange and describe portions of the collection. New materials are continually becoming available for use to support many in-park projects and private research endeavors.

All materials in the PARC are open to the public, with the exception of inactive park records with privacy and proprietary information concerns. Collections and archives support services are available for walk-in research at scheduled times throughout the week (check with Archives staff for current schedule). Appointments are also available for research if unable to visit during walk-in hours.

Copy Services

Photocopy equipment is available on-site at the Archives. Photocopies can be provided of all standard sizes as well as oversize materials. Color photocopying is available by special arrangement. Park staff performs all photocopying and fees are charged to recover the costs to the program. Duplicate photographs are available by order. Duplication fees are charged for all photographic work. Other media may be duplicated by special arrangement. Consult with Archives staff for current charges and payment information.

Rights and Publications

Researchers should review current regulations for use of archives materials, including any intended public or commercial use. Copies of archives collection materials are provided to researchers under the Fair Use provisions of the Copyright Law (Title 17, U.S.C.). Researchers must complete a Permission to Publish Contract with the Park Archivist for any other intended use of these materials (such as publication or exhibit). This contract spells out how photographic or documentary material may be acquired and used and specifies correct citation information, as well as processes which may or may not be applied to images or documents from the collections. Archives staff will be happy to consult with individual researchers regarding their needs for commercial or public use of materials from the collections.

Legal Status of Holdings

Many holdings of the Golden Gate Park Archives and Records Center were acquired by the Presidio Army Museum or Park departments prior to the formal establishment of the archives program, and were therefore accepted without formal accessioning procedures. Little documentation on the provenance (or source) exists for most materials acquired by the Army prior to 1994, and for some materials acquired by the park during its early history (1970s). All

materials received by the park since approximately 1980 have been formally accessioned and the park archives maintains on file either a formal Deed of Gift or a documented Field Collection form. For collections where provenance cannot be determined, the archives assumes that it owns the property rights to these materials, but does not own the copyright. It is the responsibility of the researcher to acquire permission from the copyright holder to cite, quote, or reproduce significant portions of any collection. The archives staff will assist researchers desiring to cite, quote, or publish portions of these early collections in determining, if possible, the copyright holder.

The Park Archives and Records Center also holds many collections developed by or for various government organizations or operations. These materials are considered to be in the public domain and may be used, cited, and quoted without restriction, provided they are properly credited to the archives and the collection. The archives contains no national security classified materials of any type.

Consult with archives staff for additional assistance.

Donations to the Collection

The Park Archives accepts donations of historic material which meet the criteria established in the Scope of Collections Statement. Photographs, scrapbooks, personal correspondence, mementos, artifacts, and other materials which meet the scope of collecting and do not duplicate existing holdings will be considered for acceptance into the permanent museum collections of Golden Gate National Recreation Area. The National Park Service maintains its museum collections in perpetuity as collections that support the mission and programs of the individual receiving park, but makes no guarantee of public exhibit of its museum collection material. If you own materials that may be related to the themes of this park, please consult with an archivist regarding deposit of these materials in the park's museum collections. If accepted, your materials will be legally transferred to the ownership of the park through a Deed of Gift process.

How to Use This Finding Aid

This aid contains information on the contents and significance of a particular collection. Most archives finding aids contain the following elements: repository information, collection history (including source or provenance) and description of archives' arrangement and descriptive activities; biographical or historical note on individual or corporate creator of the collection; series descriptions of the various groupings of material in the collection; a listing of the containers of the collection and their contents, usually to the level of the individual file folders, though some materials may be listed item by item. The finding aid also contains a Table of Contents and an Index to assist researchers in locating sections, topics or names of interest to them. After reviewing the finding aid, please discuss your specific needs with the archivist who will locate and retrieve the containers holding materials of interest for your research.

Please follow all Archives rules and regulations regarding research, the use of the research facility, and the handling of collection materials. These rules exist for the protection of the collections to ensure that they remain available and usable for generations to come. If you notice

anything which appears to be out of order or damaged, please do not move it, but notify the archivist on duty.

Alcatraz Blueprint Collection

Scope and Content

Title

Alcatraz blueprint collection

Dates

1929-1959 (bulk 1938-1941)

Collection Number

GOGA 18298

Creator

U.S. Bureau of Prisons

Volume

445 items in 26 map folders and 4 Mega map folders

Provenance

Salvaged by GGNRA Park Technicians after the Bureau of Prisons left the island

Scope Note

The collection consists of 445 drawings related to structures and activities on Alcatraz Island. The majority of the items are architectural drawings of structures constructed or modified during the Federal Penitentiary years.

Significance: At this time, these architectural drawings are the most original and complete set known to have survived for the time period 1929-1959. They are valuable for maintenance of and research on buildings and infrastructure on Alcatraz Island.

Related Records: Please note that this list is not comprehensive. It is intended as an aid to researchers. For more complete information, contact the reference archivist.

GOGA 17591 Coastal defense and Alcatraz film, ca. 1920-1959
GOGA 17934 Alcatraz Phil Dollison photo collection
GOGA 18360 Alcatraz map collection, 1847-1974
GOGA-1766 PAM slides
GOGA-2282 Don Denevi research files, 1949-1980
GOGA-2316 Interpretation photographs
GOGA-2432 Drawings – Historic Structure Report, 1900-1963

GOGA-2863 Alcatraz cellhouse – Historic Structure Report Addendum
National Archives & Records Administration, Record Group 129
National Archives & Records Administration, Record Group 121

Condition: Most of the drawings are in poor condition. A significant number of them are stained and soiled and many have large areas where information is lost. Staff will create a photocopy duplicate for researchers to use unless there is a compelling reason for the originals to be handled.

Golden Gate NRA, Park Archives, Alcatraz Blueprint Collection, GOGA 18298

Gaps: Gaps may be numerous as these documents were salvaged and the number of originals is unknown.

Preferred Citation

Completed in 1986, updated in March 2002

Agency History

Timeline

- 1769 - Spanish sighting of what eventually became known as Alcatraz Island
- 1822 - Mexican independence and transfer of Spanish territory
- 1847 - U.S. Army first surveys Alcatraz
- 1848 - End of Mexican-American War, U.S. designates Alcatraz as government property
- 1853 - Construction on support facilities and fortifications begins, lighthouse completed
- 1854 - First armaments on Alcatraz, lighthouse begins operation by Coast Guard
- 1856 - Citadel completed, first fog bell
- 1858 - Initial fortifications completed
- 1868 - Designated by army to confine military prisoners with long sentences
- 1870 - Convict laborers begin leveling portions of the peaks and cliffs
- 1906 - Construction of main prison begins
- 1907 - Ceases functioning as a fortress, designated as a military prison
- 1908 - Cellhouse construction begins
- 1909 - New lighthouse begins operation
- 1912 - Cellhouse completed
- 1933 - Federal Bureau of Prisons takes over Alcatraz
- 1934 - First federal convicts arrive
- 1939 - Civilian lightkeepers
- 1963 - Penitentiary closes, lighthouse automated
- 1969 - Indian occupation
- 1970 - Warden's house and other structures destroyed by fire
- 1971 - Occupiers leave/are removed from island
- 1971 - GGNRA created with Alcatraz within its boundaries
- 1973 - First opened to tourism

Collection and Series Description

Alcatraz blueprint collection, 1929-1959
GOGA 18928

Most of collection is comprised of architectural drawings (usually in blueprint form) of penitentiary-related structures on Alcatraz Island. They are plans for construction or modification of structures that may or may not have been carried out. Also included are utility use comparisons, patterns for chair slipcovers for the prison industries, and a rifle parts assemblage poster.

These and other documents were left in the powerhouse building on Alcatraz when the Federal Penitentiary closed in 1963. The building was not maintained and access to the island was not limited, so documents were exposed to the elements and were at risk of destruction and theft by individuals unaware of their historic value. These documents were salvaged by Park Technicians in the late 1970's.

One of the drawings was used as a sign during the Indian occupation period, 1969-1971. Notes on the verso of some of the drawings may also have been made by the people living on the island during that period, or they could be from the construction phase.

Arrangement: Numerical by drawing number; items with the same number have been called “copies.” A few of these “copies” are exact duplicates, but most of them are actually alternate versions of the same drawing.

Formats: Drawing, Architectural—blueprint, diazo, vellum

Notes to catalog file

For internal use only

Arrangement: Drawing numbers seem to have been assigned arbitrarily, probably prior to microfilming. The collection should be arranged alphabetically by building, room, structure, or object name.

Scope: Two of the drawings are patterns for slip covers. It may be useful to put them in a more appropriate collection./

Duplication: Microfilm copies of drawings have been determined to be of poor quality, primarily because the drawings were not cleaned or flattened prior to filming. Staff should make copies of individual drawings as they are requested until a complete duplicate set is made. The presence of colored notations may make it necessary for researchers to look at the originals, but otherwise they should be given the duplicates to use.

Condition: The drawings are in poor condition. Problems include soiling (with visible grit and even footprints); staining from exposure to water, soil, and mold; tears; and losses. Conservation treatment to at least clean and flatten the drawings is strongly recommended because of their condition and their high research value.
